

SIEMENS SINAMICS S120

Product Data Sheet

Model: 6SL3351-1AE37-5BA1

This component is part of the SINAMICS S120 drive system and is designed as a rectifier power module (replacement unit). It ensures reliable power conversion and is widely used in industrial drive applications.

Parameter	Specification
Product Type	Rectifier Power Module (Spare Part)
Voltage	3AC 380–480 V
Current	745 A
Frequency	50 / 60 Hz
Application	SINAMICS S120 Drive System
Category	Industrial Spare Part

Notes:

This product is classified as a spare part within the SINAMICS S120 system.
Detailed engineering data can be found in the official SINAMICS S120 system documentation.
