

SIEMENS SINAMICS S120

Product Data Sheet

Model: 6SL3351-1AG28-5AA1

This component is part of the SINAMICS S120 drive system and is designed as a rectifier module (replacement unit). It provides stable DC link power for industrial drive systems and ensures reliable operation in demanding environments.

Parameter	Specification
Product Type	Rectifier Module (Spare Part)
Voltage	3AC 380–480 V
Frequency	50 / 60 Hz
Application	SINAMICS S120 Drive System
Function	DC Link Power Supply
Category	Industrial Spare Part

Notes:

This product is classified as a spare part within the SINAMICS S120 system.
Detailed technical specifications are available in the official SINAMICS S120 documentation.
