

SIEMENS SINAMICS S120

Product Data Sheet

Model: 6SL3351-1AG31-2AA1

This component is part of the SINAMICS S120 drive system and is designed as a rectifier module (replacement unit). It provides stable DC link power and ensures reliable operation in demanding industrial environments.

Parameter	Specification
Product Type	Rectifier Module (Spare Part)
Voltage	3AC 380–480 V
Frequency	50 / 60 Hz
Application	SINAMICS S120 Drive System
Function	DC Link Power Supply
Category	Industrial Spare Part

Notes:

This product is classified as a spare part within the SINAMICS S120 system.
Detailed technical specifications are available in the official SINAMICS S120 documentation.
