

# SIEMENS SINAMICS S120

## Product Data Sheet

**Model: 6SL3352-1AG31-0AA1**

This component is part of the SINAMICS S120 drive system and is designed as a motor module (replacement unit). It provides reliable motor control and stable operation in industrial automation environments.

| Parameter    | Specification              |
|--------------|----------------------------|
| Product Type | Motor Module (Spare Part)  |
| Voltage      | 3AC 380–480 V              |
| Frequency    | 50 / 60 Hz                 |
| Application  | SINAMICS S120 Drive System |
| Function     | Motor Drive Output         |
| Category     | Industrial Spare Part      |

**Notes:**

This product is classified as a spare part within the SINAMICS S120 system.  
Detailed technical specifications are available in the official SINAMICS S120 documentation.
