

SIEMENS SINAMICS S120

Product Data Sheet

Model: 6SL3352-1AG38-1DA1

This component is part of the SINAMICS S120 drive system and is designed as a motor module (replacement unit). It delivers high-performance motor control and ensures reliable operation in high-power industrial environments.

Parameter	Specification
Product Type	Motor Module (Spare Part)
Voltage	3AC 380–480 V
Frequency	50 / 60 Hz
Application	SINAMICS S120 Drive System
Function	Motor Drive Output
Category	Industrial Spare Part

Notes:

This product is classified as a spare part within the SINAMICS S120 system.
Detailed technical specifications are available in the official SINAMICS S120 documentation.
